

Our Commitment to Responsible AI Use

At the Coalition for Children, Youth & Families, we thoughtfully incorporate artificial intelligence (AI) tools to enhance our work while maintaining our commitment to quality and authentic human connection. We believe in transparency about our technology use and want you to know that:

- We use AI to help with tasks like document editing and proofreading, brainstorming, and summarizing
- All AI-generated content undergoes thorough human review and fact-checking
- We never share confidential or sensitive information with AI tools
- Human expertise, judgment, and compassion remain at the heart of our work

Our AI usage policy ensures that technology serves as a tool to amplify—never replace—the human-centered approach that defines our organization's service to the community.
